MediPurpose™ Letter From the Chairman

19

Introduction From the Chairman

As MediPurpose™ ends its 21st year in business, I am pleased to present my annual MediPurpose report for fiscal year 2019, ended 30 June 2019.

The company's Annual General Meeting will be held in the United States on 31 December 2019. I encourage all interested shareholders to attend.

SurgiLance™ Safety Lancets

First introduced in 1999, the SurgiLance™ Safety Lancet remains MediPurpose's main product.

We are pleased that Premier members have taken to our SurgiLance Safety Lancet products with sales increasing consistently since the contract started on 1 December 2018.

We are progressively introducing our new SurgiLance Lite Safety Lancet to Latin America with several distribution partners applying for registration in various countries.

Our customers consistently compliment us on the quality of our SurgiLance™ safety lancet. I am very pleased to report that we achieved less than one complaint per six million safety lancets sold which exceeded our target of less than one complaint per three million.

The Original SurgiLance™ safety lancets

The New SurgiLance Lite™ line

babyLance™ Safety Heelsticks

Clinical Innovations' sales of babyLance™ continue to grow according to our projections.

Advanced Wound Care

Our MediPlus™ Advanced Wound Care products offer our customers a high-quality, cost-effective and comprehensive portfolio of advanced wound care dressings including thin films, hydrocolloids, foams, alginates as well as a range of antimicrobial silver foam and silicone foam products.

Several new distributors in the US and Latin America have started selling these products in their territories in 2019.

Anzen™ Safety Scalpel

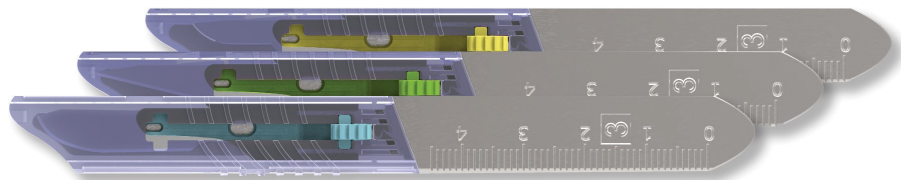

Anzen™, a safety scalpel with a reusable metal handle similar in weight and balance to traditional metal handle scalpels, provides surgeons and techs with necessary safety features without losing the familiarity, control and ease-of-use of their current scalpels.

Feedback from the initial clinical trials of the Anzen™ Safety Scalpel has been very favorable. Alpha and beta testing have now been completed and the product is ready for launch.

We now have contracts with two specialist GPOs as well as HealthTrust Purchasing Group. We are also in discussions with all the other major GPOs.

anzenscalpel.com provides valuable information on sharps safety in the OR as well as the Anzen safety scalpel.

Looking to the Future

We are committed to developing innovative safety medical products and bringing quality products to the world healthcare market.

Following the success of our SurgiLance safety lancet and the babyLance safety heelstick and successful clinical evaluations, we are excited to be able to offer our latest Anzen safety scalpel to help reduce sharps injuries in the surgical suite.

Patrick Yi, MediPurpose™ Founder and CEO
