MediPurpose[™] Letter From the Chairman

17

Introduction From the Chairman

As MediPurpose™ ends its 19th year in business, I am pleased to present my annual MediPurpose report for fiscal year 2017, ended 30 June 2017.

The company's Annual General Meeting will be held in the United States on 3 February 2018. I encourage all interested shareholders to attend.

Patrick Yi, MediPurpose™ Founder and CEO

SurgiLance™ Safety Lancets

First introduced in 1999, the SurgiLance™ Safety Lancet remains MediPurpose's flagship product.

The SurgiLance™ Safety Lancet product family now comprises the original line of 21-gauge needle and 18-gauge blade SurgiLance™ lancets and the new line of 28-gauge and 21-gauge SurgiLance Lite™ lancets.

Our customers consistently compliment us on the quality of our SurgiLance™ safety lancet. I am very pleased to report that we continue to meet our target of less than one complaint per three million safety lancets sold.

The Original SurgiLance™ safety lancets

The New SurgiLance Lite™ line

babyLance™ Safety Heelsticks

Since Clinical Innovations acquired babyLance™ on 27 July 2016, sales of babyLance™ has grown significantly and the product is now available in more countries.

Advanced Wound Care (AWC)

Our MediPlus™ Advanced Wound Care products offer our customers a high-quality, cost-effective and comprehensive portfolio of advanced wound care dressings including thin films, hydrocolloids, foams, alginates as well as a range of antimicrobial silver foam and silicone foam products.

Anzen™ Safety Scalpel

Anzen™, a safety scalpel with a reusable metal handle similar in weight and balance to traditional metal handle scalpels, provides surgeons and techs with necessary safety features without losing the familiarity, control and ease-of-use of their current scalpels.

Engineering bench testing and simulated use studies have been completed. Market feedback from administrators, surgeons, surgical technicians and distributors have been very favorable. We are now working with selected hospitals and surgery centers in the United States, Europe, Central America and Asia on clinical trials of the Anzen™ Safety Scalpel.

Our new website, anzenscalpel.com provides valuable information on sharps safety in the OR as well as the Anzen™ safety scalpel.

Our new Anzen™ safety scalpels

Looking to the Future

We are committed to developing innovative safety medical products and bringing quality products to the world healthcare market. Following the success of our SurgiLance safety lancet and the babyLance safety heelstick, we are excited to be able to launch our latest Anzen safety scalpel soon.
