MediPurpose™ Letter From the Chairman

18

Introduction From the Chairman

As MediPurpose™ ends its 20th year in business, I am pleased to present my annual MediPurpose report for fiscal year 2018, ended 30 June 2018.

The company's Annual General Meeting will be held in the United States on 31 December 2018. I encourage all interested shareholders to attend.

SurgiLance™ Safety Lancets

First introduced in 1999, the SurgiLance™ Safety Lancet remains MediPurpose's main product.

We are pleased that Premier members will now have access to our SurgiLance Safety Lancet products commencing 1 December 2018.

We are also introducing our new SurgiLance Lite Safety Lancet to Latin America beginning with Mexico.

Our customers consistently compliment us on the quality of our SurgiLance™ safety lancet. I am very pleased to report that we continue to meet our target of less than one complaint per three million safety lancets sold.

The Original SurgiLance™ safety

The New SurgiLance Lite™ line

babyLance™ Safety Heelsticks

Clinical Innovations' sales of babyLance™ continue to grow according to our projections.

Advanced Wound Care

Our MediPlus™ Advanced Wound Care products offer our customers a high-quality, cost-effective and comprehensive portfolio of advanced wound care dressings including thin films, hydrocolloids, foams, alginates as well as a range of antimicrobial silver foam and silicone foam products.

Several new distributors in the US and Latin America will be selling these products in their territories in 2019.

Anzen™ Safety Scalpel

Anzen™, a safety scalpel with a reusable metal handle similar in weight and balance to traditional metal handle scalpels, provides surgeons and techs with necessary safety features without losing the familiarity, control and ease-of-use of their current scalpels.

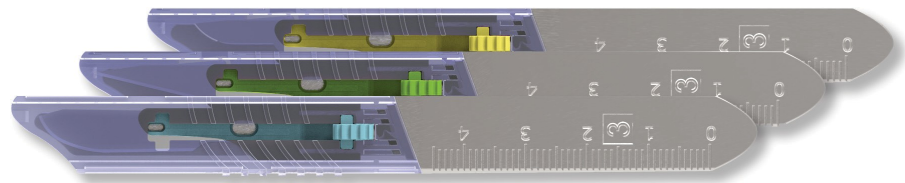

Feedback from the initial clinical trials of the Anzen™ Safety Scalpel has been very favorable.

We now have contracts with two specialist GPOs and are in discussions with several of the major GPOs.

We expect to launch Anzen in early 2019.

anzenscalpel.com provides valuable information on sharps safety in the OR as well as the Anzen safety scalpel.

Looking to the Future

We are committed to developing innovative safety medical products and bringing quality products to the world healthcare market.

Following the success of our SurgiLance safety lancet and the babyLance safety heelstick and favorable feedback from our initial clinical evaluations, we are excited to be able to launch our latest Anzen safety scalpel soon.

Patrick Yi, MediPurpose™ Founder and CEO
